

# CMO Update

A Publication for TBHC Physicians

Vol. 3 - April 2014

Dear Physician,

I would like to thank all of my physician colleagues who expressed their support for *TBHC's proposal to transform the LICH site* into a comprehensive, 21st century healthcare facility. While the RFP outcome is still undecided, we know for certain that TBHC has a wonderful team of physicians and staff poised to accomplish great things in Brooklyn. With your continued support and engagement, we will only have more success serving our borough with the best health care possible.

Gary Almedo Stephens, MD  
Chief Medical Officer

## IT UPDATE

### Patient Portal

TBHC is launching a new patient portal. This platform by Allscripts, called FollowMyHealth, enables patients to actively monitor their own health status.

FollowMyHealth also provides secure health messaging, prescription re-ordering, and scheduling of appointments.

For more information on this and other IT Projects contact Jeff Kridel, Program Manager, Clinical Information Technology at [jsk9008@nyp.org](mailto:jsk9008@nyp.org) or 407.493.9111

RN's Ms. Pratt, Ms. Coccaro, Ms. Healy-Rodriguez & Ms. Smith show off their new medication cart!

### KBMA

Knowledge-Based Medication Administration (KBMA) is a safety-focused bedside medication administration solution. KBMA combines automated workflow, advanced clinical decision support, barcode verification and safety technology, helping nurses quickly verify the "Five Rights" of Medication Administration — **right medication, right dose, right time, right route and right patient.**

### Medication Dispensing History in EMR

Patient Medication *Dispensing History* can now be pulled from SureScripts, then viewed and selected for inclusion on the Home Medication screen in SCM. The provider can also review patient drug co-pay/deductible amounts based on the patient's insurance plan coverage.

### Customized Documentation for CDU Patients

There are new features to help meet the clinical and billing requirements in our Clinical Decision Unit (CDU) (Unit 9B): Structured Notes for Clinical Documentation; "Place in Observation" Order; Disease Specific Order Sets; Observation Priority in Order Entry; Observation Patient Lists; ED Tracking Board Alerts.

Dr. Peter Smith, Interim Division Chief, Internal Medicine was instrumental in getting the CDU EMR operational.
