EYE ON RADIOLOGY

Keep a close eye on the Department of Radiology. They're developing faster than a digital X-ray!

In late 2013 Radiology opened a new PET-CT service, offering best-in-class diagnosis and treatment options useful for Cardiologists, Endocrinologists, Internists, Neurologists, Oncologists, Otolaryngologists, Pulmonologists and Surgeons.

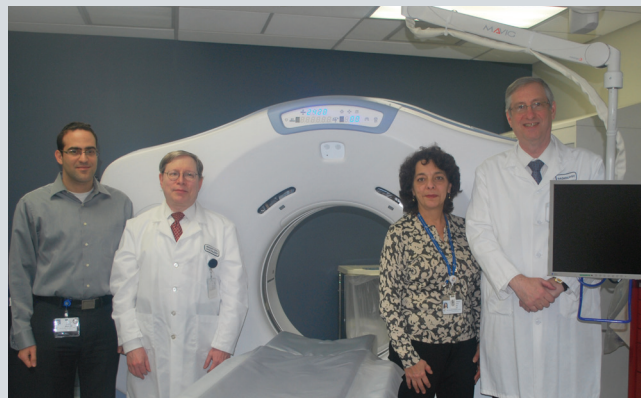

More recently, Radiology acquired two new low-dose CT scanners and new digital X-ray equipment, decreasing radiation exposure to patients.

The Department's Radiation Oncology division will also soon have an extremely precise "true beam" linear accelerator (linac) by Varian.

"We're proud of these acquisitions," says **Department Chair Shalom Buchbinder, MD, FACR, FSBI**. "But our physicians and technologists are the ones who really bring out the value in all of this state-of-the-art equipment."

In 2013 the Department proudly welcomed **Dr. David Sherr** to Radiation Oncology and Neuroradiologist/Interventionalist **Dr. Daniel Masri**.

Please contact **Dr. Buchbinder** directly with questions and comments: [718.250.8230](tel:718.250.8230).
